

“How do I give my customers  
the highest quality touch-free  
wash in the industry?”

---

With contour-following Turbo  
Technology on the leading  
touchless gantry system.

---

# AquaJet XT

Advantages for you and your customers.

---

- Choose from two high pressure pumping plants to match the throughput needs for your site.
- Provides best-in-class cleaning results using Mark VII's Turbo Technology.
- Up-sells customers with a wide variety of value-added services.

“How can I earn even more profit from my carwash business?”

## 4DIMENSIONS for a successful carwash business.

Mark VII's Turbo Technology sets the standard for high quality wash results on a touch-free rollover. Like no other system, AquaJet XT meets your customers' demanding requirements for wash quality, speed, ease of use and design — what we call the 4DIMENSIONS of a modern carwash.

AquaJet XT delivers an incredible customer experience combined with the business results you require. No other touch-free rollover on the market provides this level of wash quality that is sure to impress your customers.

With [4DIMENSIONS](#), discover how AquaJet XT ensures maximum customer satisfaction and profits for you.

# Innovations to separate you from your competition.

### Turbo Touch-Free Technology

A contour-following top boom, high pressure pumping plant and 28 zero degree turbo nozzles deliver best-in-class cleaning results to customers choosing a touchless wash program.

### Throughput Options

Two high pressure pumping plants are available to match your expected wash volume. Both can be located either on-board (shown) or in an equipment room.

### WheelJet

Our premium wheel cleaning system is angled for better centring, has larger brushes for better coverage, and integrates high pressure for added cleaning power. Our basic HubScrub system is also available.

### WheelStorm

Our high pressure rotating wheel cleaning option provides an alternative to wheel brushes.

### Triple-Foam

Customers love the colorful display and scent and are willing to pay more for wash packages that include them.

### Lower Operating Costs

Use as little as 24 gallons of water on a basic wash and 30 gallons on a deluxe wash, compared to other systems using 60-70 gallons or more.

### Choice of On-Board or Freestanding Dryers

AquaDri dryers are designed to thoroughly shed water from the vehicle after washing. Available in several configurations to match your needs.

### VFDs increase reliability and performance.

Drive system and high pressure boom lift drives are frequency controlled for smooth start and variable speed control. Stress on components is reduced and the machine runs smoother.

### Premium Wax System

The premium wax system enables the use of chemicals such as Rain-X to provide extended protection of all vehicle surfaces while driving incremental revenue for the carwash operator.

### HyperTilt

Top high pressure boom rotates 270 degrees to ensure thorough cleaning of the front and rear of cars.

### K100 Controller

Provides unparalleled flexibility to create wash programs and control speed to ensure optimal cleaning results and maximize choices for the customer.

# Make your carwash unique.

## FoamTecs:

### A foam wash with a wow effect.

FoamTecs applies any foaming chemical to the vehicle in a voluminous curtain of foam. Programmable LED lighting turns the application into a spectacular customer experience, providing another way to up-sell customers to your premium wash package.

## LightDoors:

### Light the way for your customers.

LightDoors use an array of 20 LED light bars to attract customers to the carwash, guide them into the bay, display a dramatic show during the wash program, and provide another visual cue when the wash is over and it's time to exit.

## Classic Doors

The original ABS plastic doors are available with your choice of blue, red or custom accent panels (at additional charge).

## Stainless Steel Doors

For customers who prefer the shiny look of stainless steel. They can be easily customized with your branding by having them "wrapped" by your local sign company.

# Remote carwash management: Mark VII Plus.

Check the status of your bays and sites at a glance on the Mark VII Plus dashboard using any computer or mobile device. Drill down to see details about wash counts, revenue, machine status, etc., and receive instant alerts when issues arise.
